honest post erasure package
first declaration registration
exact replay registration
repeat inspection after registration
different verifier local registration
modified retained evidence
modified erased commitment
invalid origin signature
invalid tombstone signature
modified merkle path
truncated merkle path
swapped merkle direction
substituted anchor root
invalid anchor signature
insufficient finality quorum
duplicate finality signer
invalid finality signature
authenticated wrong tombstone linkage
authenticated tombstone before origin
authenticated tombstone before request
authenticated expired request
authenticated scope mismatch
conflicting declaration identity
coherent whole witness substitution
cross event tombstone substitution
invalid request authority signature
missing required artifact
canonical transport roundtrip
authenticated false erasure declaration
logical application erasure observed
replay after verifier restart
inspection after verifier restart
